Convey Dangerous Goods By Road: Re-certification Webinar

Enjoy interactive teaching with our Convey Dangerous Goods By Road: Recertification webinar. As an approved training provider (PrDP(D) 2019/213), our course meets all the legal requirements for certification, and offers convenient webinar training for those needing to renew their certificates ahead of expiry.

By taking the course, drivers will learn how to:

- safely load, convey and off-load dangerous goods according to legal and organisational requirements;
- convey dangerous goods in accordance with legal, safety, manufacturer and other relevant requirements; and
- manage any incidents safely, as and when they occur.

Designed to ensure compliance with Chapter 8 of the Road Traffic Act 1996, the course will equip drivers with the necessary skills to:

- comply with relevant legal documentation requirements;
- apply safety and standard operating procedures during loading and off-loading;
- apply safety procedures in the event of an incident; and
- comply with the requirements of SANS 10231 in terms of behaviour en route.

Those drivers wishing to complete the necessary certification for the first time will need to attend class in person at one of NOSA's training facilities. However, those who simply need to renew their certification will be able to do so conveniently via a training webinar. Renewing certification ahead of expiry will not only allow drivers to stay within legal guidelines, but also avoid incurring unnecessary costs.

Register by 16 October 2020 to be part of the webinar programme launching 21 October 2020.
